# Flood map for planning

| Your reference | Location (easting/northing) | Created |
|---|---|---|
| **Unspecified** | **443551/161359** | **12 October 2026, 10:08** |

## Your site is in flood zone 1

An area with a low probability of flooding from rivers or the sea.

### Flood risk assessments

You will need to do a flood risk assessment if:

- your site is more than 1 hectare
- your location has been identified as having critical drainage problems
- your location is identified in the local planning authority's (LPA) strategic flood risk assessment (SFRA) as being at increased flood risk in future
- development would increase the vulnerability classification and land may be subject to sources of flooding other than rivers or sea

### Data in this summary

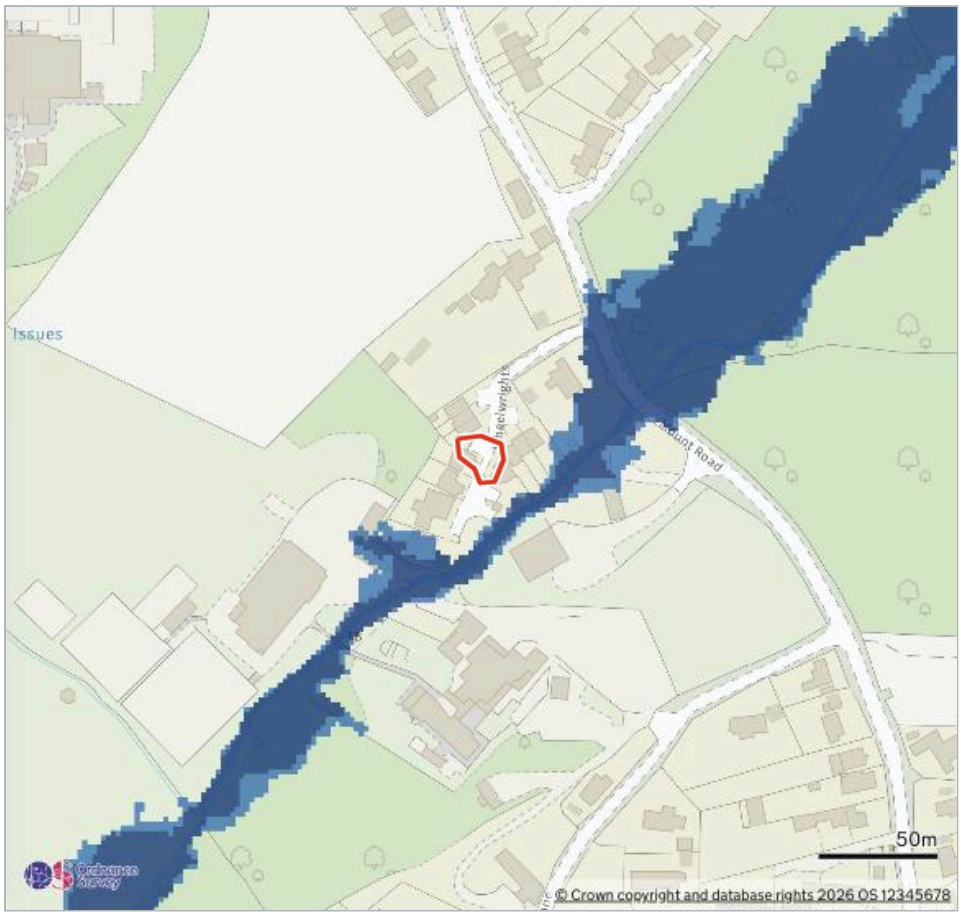

This summary includes flood zones, flood zones with climate change, surface water and surface water with climate change. Surface water is shown at a 1 in 100 chance.

**At a glance for your site**

| Data | Result for your site |
|---|---|
| **Flood zones** | Flood zone 1 |
| **Flood zones with climate change** | Flood zone 1 |
| **Surface water, present day** | Surface water at a 1 in 100 chance, up to 300mm deep. See sample points |
| **Surface water with climate change** | Surface water at a 1 in 100 chance, up to 300mm deep. See sample points |

# Flood zones

Flood zones show the chance of flooding from rivers and the sea, ignoring flood defences. They are used to decide whether a flood risk assessment is needed.

**Flood zones, present day**

## Key

- Flood zone 3
- Flood zone 2
- Flood zone 1
- Your site boundary
- Flood defence
- Main river
- Water storage area

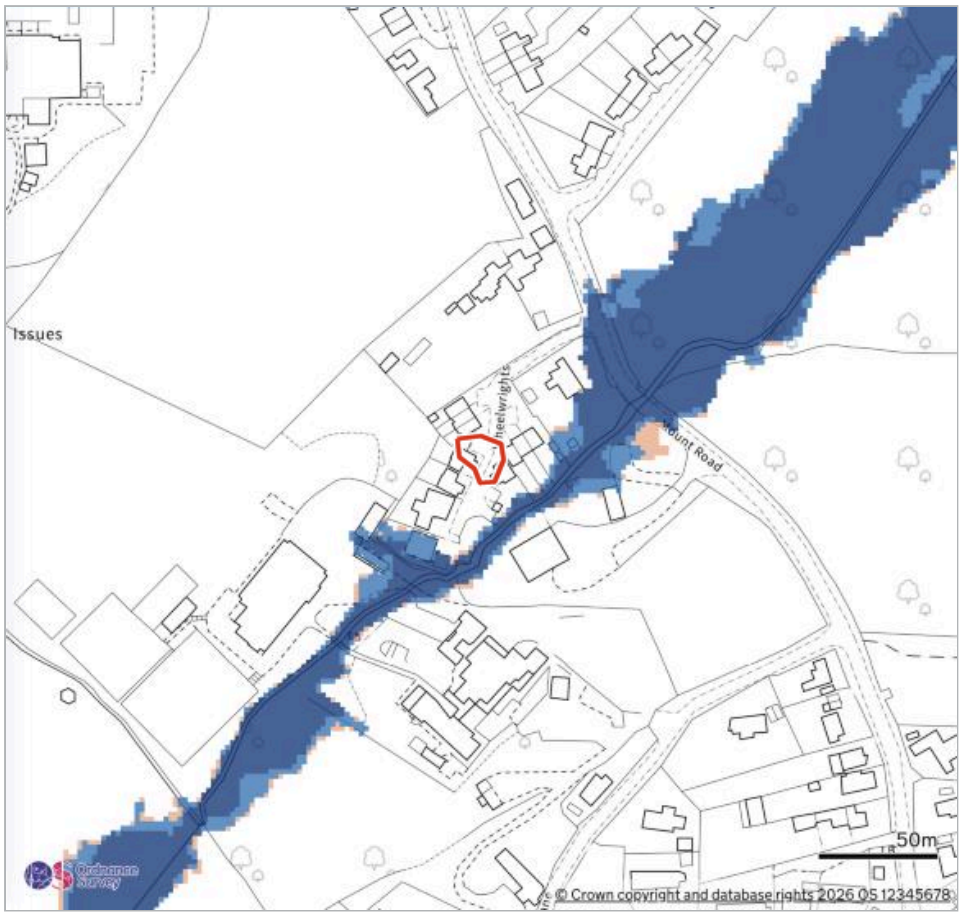

| Your reference | Location (easting/northing) | Scale | Created |
|---|---|---|---|
| **Unspecified** | **443551/161359** | **1:2,500** | **12 October 2026, 10:08** |

Flood zone 3 has a 1% or greater chance each year of flooding from rivers, or a 0.5% or greater chance from the sea. Flood zone 2 has between a 0.1% and 1% chance from rivers, or between 0.1% and 0.5% from the sea.

Source: Environment Agency, National Flood Risk Assessment (NaFRA2). The data shown is correct on the date this summary was created.

# Flood zones with climate change

How flood zones 2 and 3 could extend between 2070 and 2125, based on a central allowance for climate change.

**Flood zones with climate change**: 2070 to 2125

## Key

- Flood zone 3
- Flood zone 2
- Extra area with climate change
- Your site boundary
- Flood defence
- Main river
- Water storage area

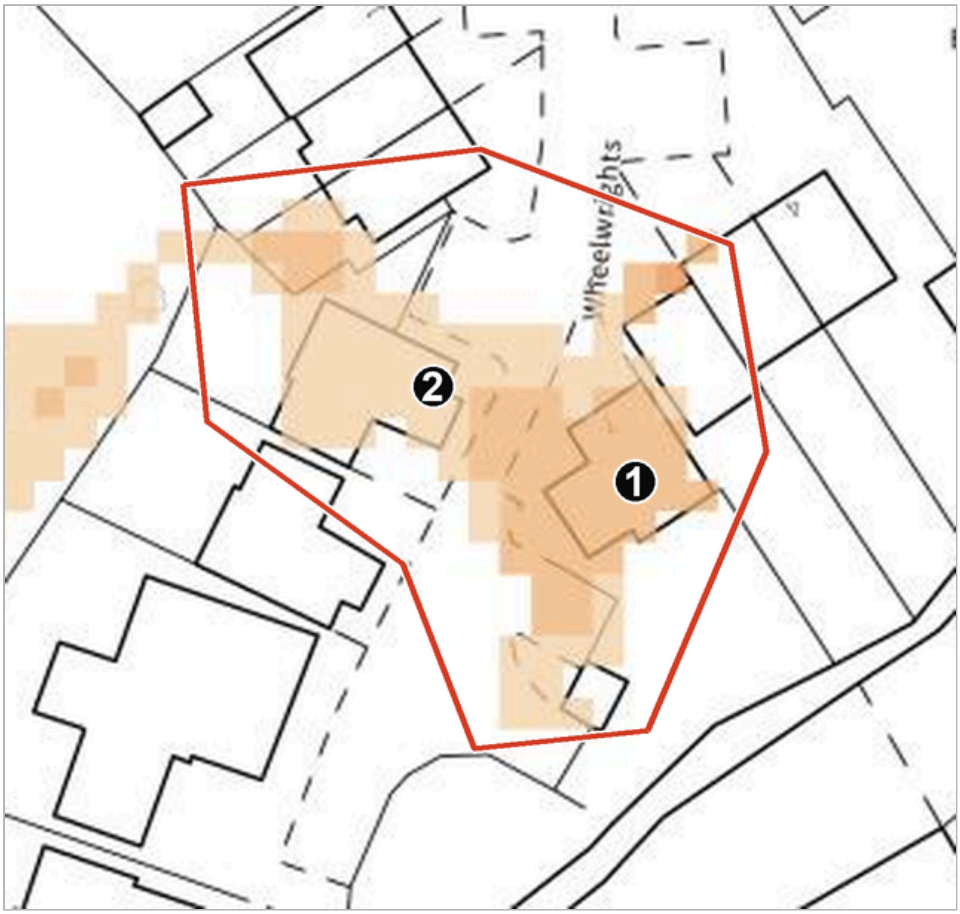

| Your reference | Location (easting/northing) | Scale | Created |
|---|---|---|---|
| **Unspecified** | **443551/161359** | **1:2,500** | **12 October 2026, 10:08** |

Use this alongside the present day flood zones to understand how flood risk could change over the lifetime of a development.

Source: Environment Agency, National Flood Risk Assessment (NaFRA2).

# Surface water, present day

Surface water flooding happens when heavy rain cannot drain away. It is not part of the flood zones, so it does not change whether a flood risk assessment is needed, but you may need to consider it in one. The map shows areas with a 1 in 100 (1%) chance of flooding each year. Numbered points mark each depth found within the boundary, so the depths can be read without relying on colour.

**Surface water, present day**: 1 in 100 (1%) chance each year, with sample points

## Key

**Surface water depth in millimetres**

- Under 150
- 150 to 300
- 300 to 600
- 600 to 900
- 900 to 1,200
- 1,200 to 2,300
- Over 2,300

- Your site boundary
- Flood defence
- Main river
- Water storage area

1 Sample point

| Your reference | Location (easting/northing) | Scale | Created |
|---|---|---|---|
| **Unspecified** | **443551/161359** | **1:200** | **12 October 2026, 10:08** |

**Surface water depth at each point, present day, 1 in 100 chance**

| Sample point | Depth |
|---|---|
| 1 | 150 to 300mm |
| 2 | Under 150mm |

Sample points are only shown where there is surface water. Depths are read from the mapped depth band at each point.

The map shows the area that could flood from surface water with a 1 in 100 chance each year, and how deep the water could be. One sample point is placed in each depth band found within the boundary. Points are only shown on a map where it shows surface water.

Source: Environment Agency, National Flood Risk Assessment (NaFRA2), risk of flooding from surface water.

# Surface water with climate change

How surface water flooding with a 1 in 100 (1%) chance each year could change between 2061 and 2125, based on a central allowance for climate change.

**Surface water with climate change**: 1 in 100 (1%) chance each year, with sample points

## Key

**Surface water depth in millimetres**

- Under 150
- 150 to 300
- 300 to 600
- 600 to 900
- 900 to 1,200
- 1,200 to 2,300
- Over 2,300

- Your site boundary
- Flood defence
- Main river
- Water storage area

1 Sample point

| Your reference | Location (easting/northing) | Scale | Created |
|---|---|---|---|
| **Unspecified** | **443551/161359** | **1:200** | **12 October 2026, 10:08** |

**Surface water depth at each point, 2061 to 2125, 1 in 100 chance**

| Sample point | Depth |
|---|---|
| 1 | 150 to 300mm |
| 2 | Under 150mm |

Sample points are only shown where there is surface water. Depths are read from the mapped depth band at each point.

# More data for your site

If you need more detail for a flood risk assessment, you can request a Product 4 (detailed flood risk data, including modelled flood levels and flood defence details) from the flood map for planning service.

Find out about other sources of flood risk:

## Notes

This information relates to the selected location and is not specific to any property within it. The data is updated regularly and is correct on the date this summary was created. Keep this summary as a record of the data at that time.

Use this data alongside the local planning authority's strategic flood risk assessment (SFRA). Check the data is suitable for your intended use.

Flood risk data is covered by the Open Government Licence: www.nationalarchives.gov.uk/doc/open-government-licence/version/3
